

ALUMINIUM BIFOLD DOORS

Balanced Bifolds

Beautiful aesthetics with exceptional thermal performance.

Transform your home with the incredible versatility of bi-folding doors. These doors provide the perfect solution for seamlessly merging your indoor and outdoor spaces. Crafted with elegant aluminum frames and equipped with the latest thermal and security technology, bi-folds offer a harmonious balance of style and practicality.

Open up your living space and enjoy the beauty of these doors that effortlessly connect your home with the outdoors.

Aluminium bifold doors are designed to enhance the natural light in your home and make your garden or patio more enjoyable. They provide a sense of spaciousness and offer stunning panoramic views that can completely change the look of your interiors. Plus, they are built for reliable operation, energy efficiency, and security against potential intruders.

With a wide range of configurations, styles and colours to suit every project.

Depending on your layout you can choose to have your doors split or open all to one side. Including a single traffic door in your configuration is a great way to add an everyday entrance.

Key Features

Slim Sightlines

Slim, equal 138mm sash-to-sash sightlines ensure that light bathes your interiors, even when the doors are closed.

Thermal Performance

Innovative Thermlock multi-chamber design delivering exceptional energy efficiency and low U-values.

Outstanding Security

High security locks with anti-snap, anti-bump, anti-pick protection and interlocks. The extra strong frames have a patented corner jointing method.
